

Three Wise Men

Lino Cut Pelicans at Point Turton, South Australia

“

I have been a vet since 1990. My career has spanned mixed practice, private practice and charity in the UK, volunteer work in various areas of Asia and parts of Europe and now in Australia, mainly ECC and critical care and working in the non-profit sector as well. I have always been interested in Art and try to make time to do art (often difficult). I took a year out a few years ago to do a diploma in visual art and hope to do more when I retire in a few years !

Every day that I go to work, even though ECC work can be challenging emotionally, it's still fun to deal with the varied caseload and to work with a huge variety of veterinarians—skillset and ages!

Most recently during the pandemic I did some mixed practice work after a long break of 30 years (with some supervision) and I loved the joy of seeing lambings and helping bring a little fluffy life into the world!
