

SURGICAL DENTISTRY FOR CATS & DOGS WORKSHOP

Day 1: DOGS

Friday 23 February 2024

Topics covered:

- Complex surgical extractions
- Oronasal fistula repair
- Diagnosis of dental tumours
- Dental radiology and interpretation

Day 1- DOGS		Brief description
8.30	Registration	
9.00	Lecture: Dental radiographs – interpretation	Introduction to interpreting dental xrays – what is normal?
9.30	Lecture: Dental diseases in dogs	Diagnosing common canine dental diseases based on clinical and radiographic findings, and treatment options.
10.30	Morning Tea	
11.00	Practical: Taking x-rays	Demo / practice
12.00	Practical: Local anaesthetic techniques for oral surgery in dogs	Demo /practice
12.30	Lunch	
13.00	Lecture: Difficult dental extractions – tips and tricks for surgical extractions	Step by step guide to removing canines and carnassials without the complications.
13.30	Lecture: Dealing with complications of extraction surgery	Including fractured roots and oronasal fistula closure
14.30	Extraction workshop	Use of a mechanical periosteal elevator (Vet-Tome, iM3 PL) to assist in difficult extractions.

15.00	Afternoon Tea	
15.30	Extraction workshop (cont.)	
16.30	A Lump is a Lump....	A logical approach for diagnosing oral masses and tumours
17.00	Panel Discussion	Drs Anthony Caiafa and Kayo Kuroda will answer any further questions from participants
17.30	End	

Day 2: CATS

Saturday 24 February 2024

Topics covered:

- Diagnosis of common feline dental pathologies
- Dental radiology and interpretation
- Tooth sealing and preservation
- Extraction techniques, review and mastery

	Day 2- CATS	Brief description
8.30	Welcome	
9.00	Lecture: Feline gingivostomatitis/tooth resorptions	A discussion of the aetiology, pathogenesis and management of common oral conditions in the cat
10.00	Lecture: Radiographic interpretation of common oral diseases in the cat	A presentation of clinical photographs and corresponding intraoral radiographs with audience participation
10.30	Morning Tea	
11.00	Practical Workshop	Part I: Dental radiographic positioning for cats Part II:

		<ul style="list-style-type: none"> - Demonstration and hands on use of dental bonding materials for occlusal trauma cases - Demonstration of maxillomandibular fixation in cats
12.30	Lunch	
13.00	Lecture: Extraction techniques	Surgical extraction techniques that are specific to cats
13.30	Lecture: Extraction techniques	Continuation of surgical extraction techniques that are specific to cats
14.00	Practical Workshop	<ul style="list-style-type: none"> - Continuation of surgical extractions including arcade extractions - Crown amputation techniques for tooth resorptions - Use of mechanical periosteal elevator (Vet-Tome iM3 PL) to assist in the extraction process
15:00	Afternoon Tea	
15:30	Practical Workshop (Cont.)	Continue with arcade extractions in cats
16:30	Local anaesthetic techniques Demonstration	Identify anatomical landmarks for local anaesthesia and to practice local anaesthetic techniques in cats
17:00	Panel discussion	Drs Anthony Caiafa and Kayo Kuroda will answer any further questions from participants
17:30	End
